

# MAGNUM Standard Control

## On/off thermostat

In some situations, digital control is less necessary, and simple on/off control is preferred. Particularly in industrial applications or if continuous heating is desired. For this purpose, MAGNUM has developed the Standard Control: a simple on/off thermostat with temperature control that excels in simplicity and ease of operation.

### Technical details

- Voltage 230 volts - 50/60 Hz
- Max. load 16A / 230 V
- Temperature range 5°C / 40°C
- Class IP21
- Colour Polar white (RAL 9010)
- Inspection CE
- On/off thermostat with temperature control
- Including floor sensor (12K)
- Built-in room sensor and floor limit sensor
- Multi-frame adapter system for: Gira, Jung, Elko, Merten, Busch Jager etc.

#### Sensor selection:

Floor sensor, room sensor or room sensor with floor limit (30°C)

#### Features:

- Manual temperature control
- Adjustable temperature limit function
- Temperature tolerance
- Adjustable setback temperature

#### Installation method

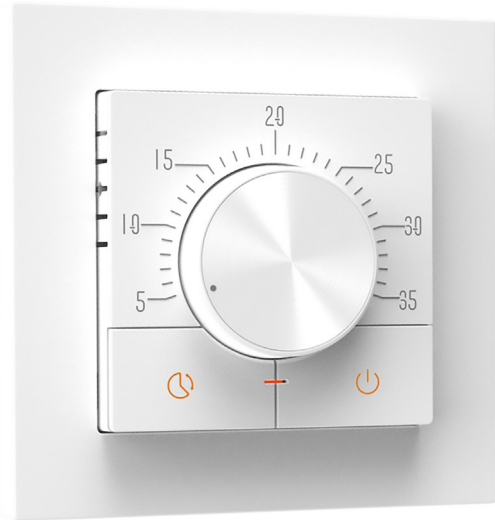

Suitable for electric heating systems.

#### Packaging contents

- Thermostat
- Installation instructions
- Floor sensor (12K)

#### Warranty

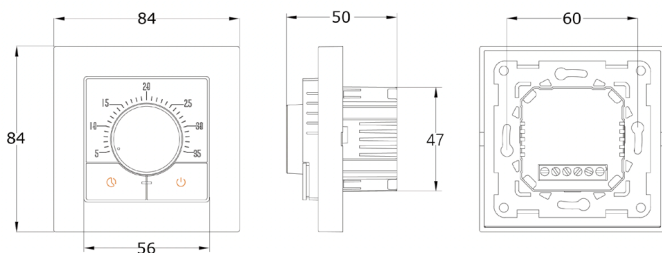

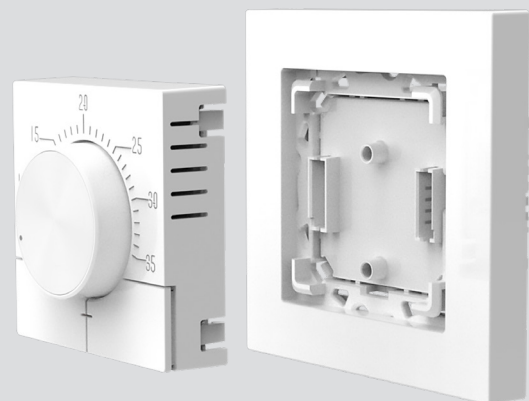

2-year warranty on electrical operation and floor sensor.

MAGNUM S-Control

### Specifications

Type	On/off thermostat
Suitable for	Electrical systems
Operation	Physical buttons
Sensors	Room and floor sensor (12K)
Voltage	230V - 50/60Hz
Maximum load	16A / 230V
Temperature range	5°C / 40°C
Housing	IP21

Item no.	Description	Colour code
827000	MAGNUM Standard Control On/Off thermostat	Polar white - RAL 9010
